Week 3 Lab

FACULTY OF ENGINEERING, RUPP

COURSE: WEB AND CLOUD TECHNOLOGY PART I

INSTRUCTOR: TOUCH NGUONCHHAY

TASK 1

Write a program to reverse this string from "emocleW ot PHP" to "Welcome to PHP"

TASK 2

There is an indexed array $arr = [2, 3, 4, 6, 7, 9, 11, 20]. Write a php program to filter this array by even number using arrow function.

TASK 3

We want to implement a function that could sum all provided values as below.

- $total = sum (2, 3) then $total = 5
- $total = sum (2, 3, 4) then $total = 9
- $total = sum (2, 3, 4, 5) then $total = 14
